enien cake Apfelkuchen backen to bake an apple cake Schokoladenkuchen Kuchenblech Some of the best tips you can get when you start translating to English or Spanish is to translate to mean instead of translating words. Sometimes what you want to translate will be simple enough that there will not be much difference between the two approaches. But more often than not, paying attention to what someone is saying, not only the words that the person is using, will pay to do a better job of transmitting the idea that someone is trying to cross. By translating from one language to another, it is intended to convey meaning rather than translating individual words. Literary translations are often short because they may not take into account the context and the nuances of meaning. Often there is no single "best" translation, so two translators can legitimately differ in their word choices. An example of an approach that you could take to translate can be seen in the answer to a question that a reader raised by email about an article that used to appear this site: When you are translating from one language to another, how do you decide what word to use? I wonder why I've recently seen that you translated "bold," but that's not one of the words that appears when I looked for that word in the dictionary. The question refers to my translation of the phrase "The appropriate formula for winning eye-catching gains?" (taken from a Spanish Mayan ad) as "the revolutionary formula for getting daring tabs?" The writer was correct that the dictionaries do not give "bold" as a possible translation, but "bold" is at least closer to the concept of the dictionary definition of what I used in my first draft: Then I used "tick", which is not even close to any standard of flashing, ose os ritucisid ed setna n'Aiccuadart al ed saAfosolf sasrevid sal racilpxe word. In general, it can be said that there are two extreme approaches in the way one can translate from one language to another. The first is to look TREATMENT OF ATTENTION TO THE CONTEXT. A second end is paraphrasing, sometimes called making a free or loose translation. A problem with the first approach is that literal translations can be unique. For example, it may seem "exact" to translate the Spanish obtener as "obtain", but most of the time "get" will function equally well and sound less pretentious. An obvious problem with paraphrase is that the translator cannot precisely convey the intention of the speaker, especially when precise language is required. Many of the best translations take a medium type, sometimes known as dynamic equivalence, trying to transmit thoughts and intention to the origins of the original as soon as possible, turning from the literal where necessary to do so. In the prayer that led to the reader's question, the adjective calls does not have an exact equivalent in English. It derives from the verb to call (sometimes translated as "call"), so in general terms that refers to something that attracts attention to itself. Dictionaries generally provide translations such as "striking", "striking", "of bright colors", "strong" and "strong" (as in a strong shirt). However, some of these translations have somewhat negative connotations, something certainly does not pretend the writers of the ad. The others do not work well to describe the tabs. My first translation was a paraphrase; The râmel is designed to make the tabs More thick and, therefore, more notable, so I went with "thick." After everything, in English that is a common form of The kind of tabs that Maybelline's clients would like. But after reflection, that translation seemed inadequate. This mask, another part of the announcement noted, not only makes the tabs look thicker, but also longer and exaggerated or "exaggerated." I considered alternative forms of expressing flames, but "attractive" seemed too weak for an ad, "improved" seemed too formal, and the "attention of attention" seemed to convey the thought behind the Spanish word in this context, but did not. Looks right for an ad. So I went with "Bold." I thought doing a good job by asserting the purpose of the product and it is also a short word with a positive connotation that could work well on an ad. (If I wanted to go for an extremely loose interpretation, I could have tried "What is the secret for the tabs to be noticed by people?") A different translator could have used a different word, and very well there could be words that would work better. In fact, another reader suggested "surprising," a great option. But translation is often more art than science, and that can involve judgment and creativity at least as much as knowing the words "correct".
